

User Manual for Racing Game

By FYP-22-S2-07

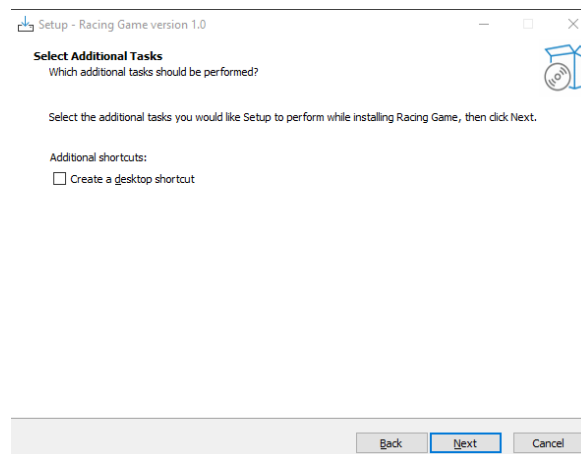

Installation Guide

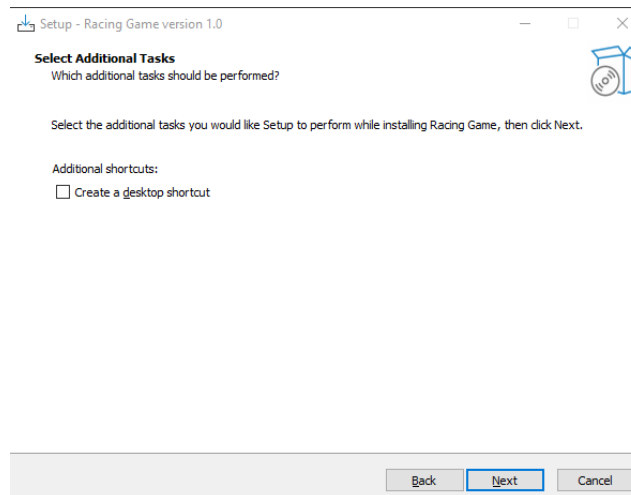

1. Download and extract the “Racing Game Setup.exe” to anywhere in your device.
2. Double-click on the file to start the installation.

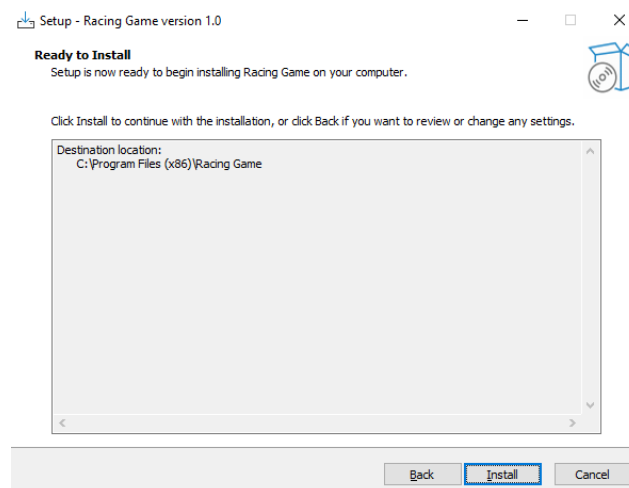

3. Select the recommended installation mode.

4. Click browse to select the location to install your game and click “Next”.

5. If you wish to create a desktop shortcut for the game, check the box. Otherwise, click “Next” again.

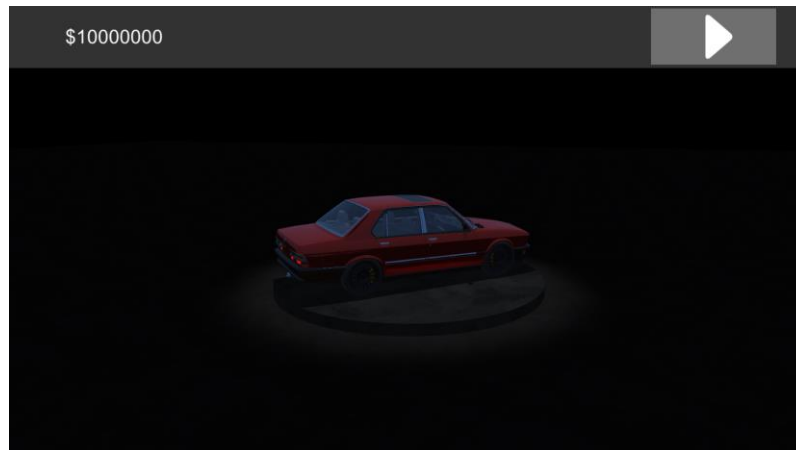

6. Finally, click Install.
7. If you chose to create a desktop shortcut, a shortcut for the game will appear in your desktop once the installation is done. Otherwise, look for the game folder specified during installation.

	MonoBleedingEdge	18/8/2022 12:26 AM	File folder	
	Racing Test Data	18/8/2022 12:26 AM	File folder	
	Racing Test.exe	12/6/2021 3:18 AM	Application	639 KB
	UnityCrashHandler64.exe	12/6/2021 3:19 AM	Application	1,221 KB
	UnityPlayer.dll	12/6/2021 3:19 AM	Application exten...	27,406 KB

8. Double-click on Racing Test.exe to launch the game.

How to Play

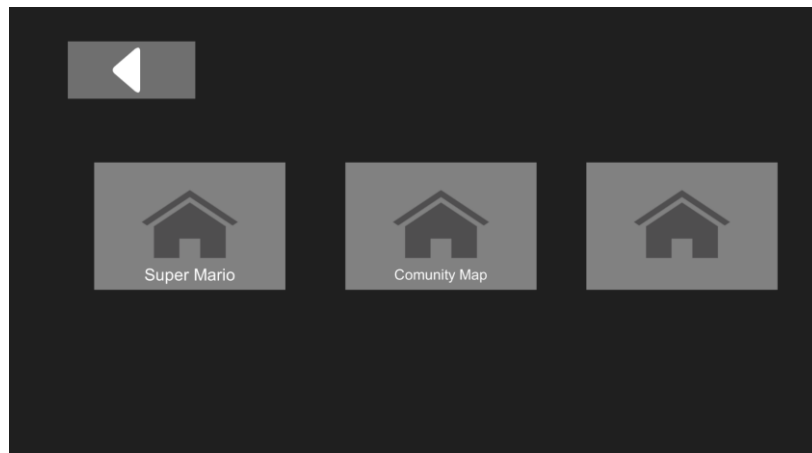

1. Click on the start button to enter the game

2. Scroll through the selection of cars and click on the lock icon to unlock it. Click on the tick button to select your car or the customize button next to it to customize your car.

3. You can customize your car by selecting any of the available customizations.

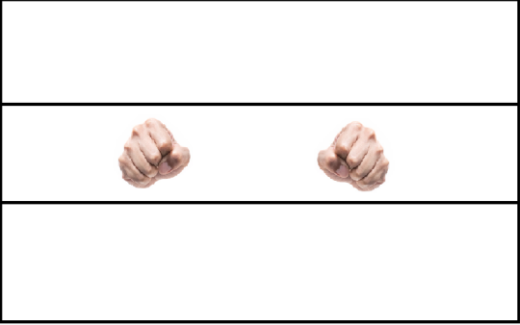

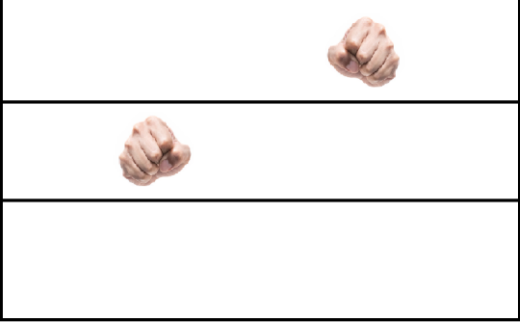

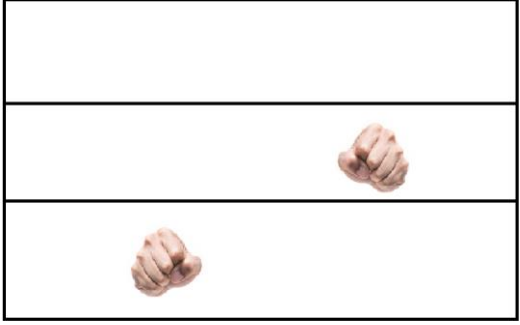

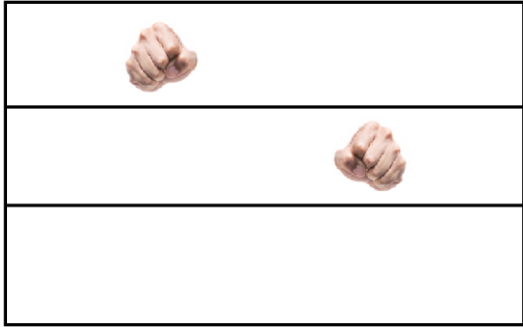

4. Once you're ready, click the tick button and proceed to select a map to play on.

How to Control

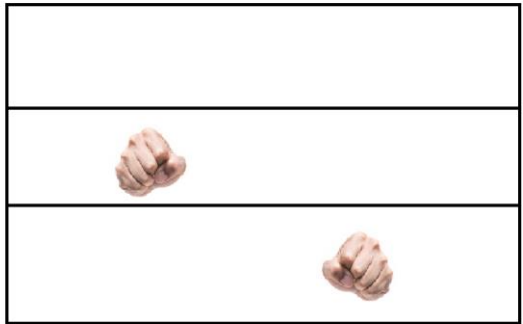

*Refer to User Manual for hand gesture recognition program on how to launch before playing.
